Jose Vigil

CEO & Founder at Notimation

Argentina

Summary

Helping the hidden market go digital

In 2018, I founded my company Notimation to provide B2B businesses with tailored marketing services. Along the way, I discovered a much larger opportunity: individuals and small businesses with big dreams, but also big fears, stepping into the market for the first time.

This is a massive, often overlooked segment that is about to enter the digital world—and I'm committed to guiding them through that journey with an all-in-one approach with a product called Small that turns ideas into sustainable businesses.

Living my dreams, creating while building

Industrial Designer | Software Engineering | Entrepreneur

Experience
